

City of Stoughton

Ordinance 10-2(d) Terrace Tree Planting Guidelines

This form is to be used by the City Forester to help consistently determine the amount of trees needed for each lot or parcel that is required under Ordinance 10-2(d). The goal is to plant the most robust trees, at maturity, that are properly suited for the location for which trees are required and taking into account existing trees that meet the requirements of the ordinance.

Fill out only the Parcel/Owner portion of this form. Calculations will be filled out by the City Forester and returned to the Planning Department

Name of Parcel Owner: _____ Date: _____

Address of Parcel: _____

Telephone Number of Parcel Owner: _____

Scope of Building Project: _____

Terrace Tree Calculations

Step 1: Select Terrace Width

<u>Select One</u>	<u>Park Row Width</u>	<u>Tree Size</u>	<u>Tree Spacing</u>
_____	4'-6'	Small	30'
_____	6'-8'	Medium	40'
_____	8' plus	Large	50'

Step 2: Calculation to Determine Number of Trees

Total Property Frontage _____ divided by tree spacing from above _____ = Number of trees _____

**Round all numbers down to the nearest whole number (Minimum of 2 trees)*

Step 3: Existing Trees Identified Within the Right-of-Way

Total number of trees credited that meet the requirements of Ord. 10-2(d): _____

Step 4: Calculate Payment to the city

Total number of trees required _____ x \$325 = _____ *(Minimum of two trees)*
